Shutter Styles

Full Height

Timeless and versatile, full height shutters are our most popular style, covering the entire window for an elegant look. Perfect for both classic and modern interiors, with customisable options to suit your lifestyle.

QUALITY YOU CAN TRUST

Most of our shutter ranges come with an incredible 10-year warranty.

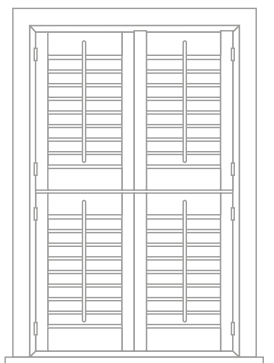

FULL HEIGHT | CUSTOM COLOUR | JAVA

TIER-ON-TIER | PURE WHITE | CUBA

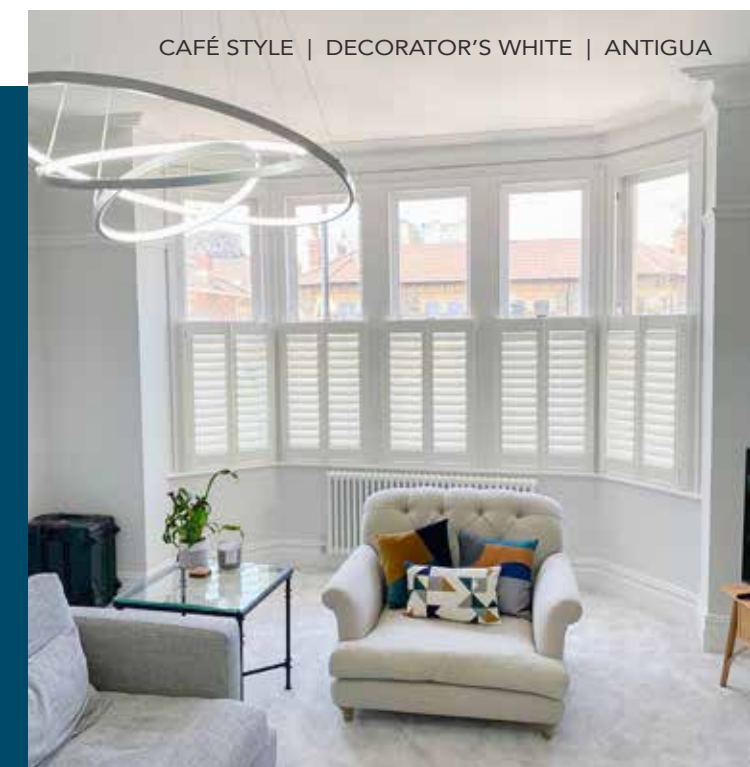

Tier-on-tier

Offering the elegance of full-height shutters with added versatility, tier-on-tier designs feature independently operable top and bottom sections. Enjoy privacy while still allowing natural light in - ideal for sash windows or spaces needing flexible light control.

CAFÉ STYLE | DECORATOR'S WHITE | ANTIGUA

Café Style

Contemporary and stylish, café-style shutters cover only the lower part of your window, balancing privacy with maximum daylight. A perfect choice for creating a bright, inviting space while maintaining a touch of elegance.

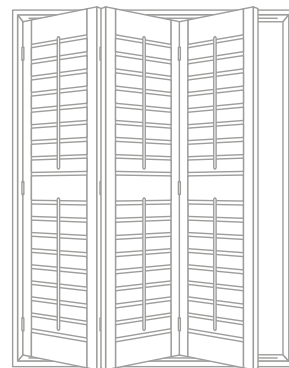

Tracks and Doors

Beyond windows, shutters are a stylish and practical solution for open-plan living. Use them as room dividers, wardrobe doors, or to elegantly frame French or patio doors - offering both functionality and effortless sophistication.

NOT JUST FOR WINDOWS

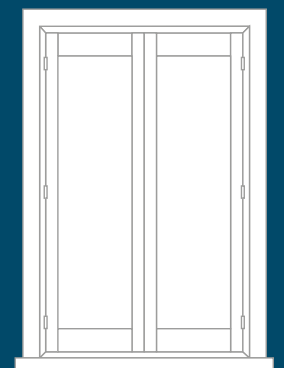

Available in bi-fold and bypass styles, most of our shutters are perfect for room dividers, French doors, patio doors, and large windows.

FULL HEIGHT | SOLID PANEL
SILK WHITE | FIJI

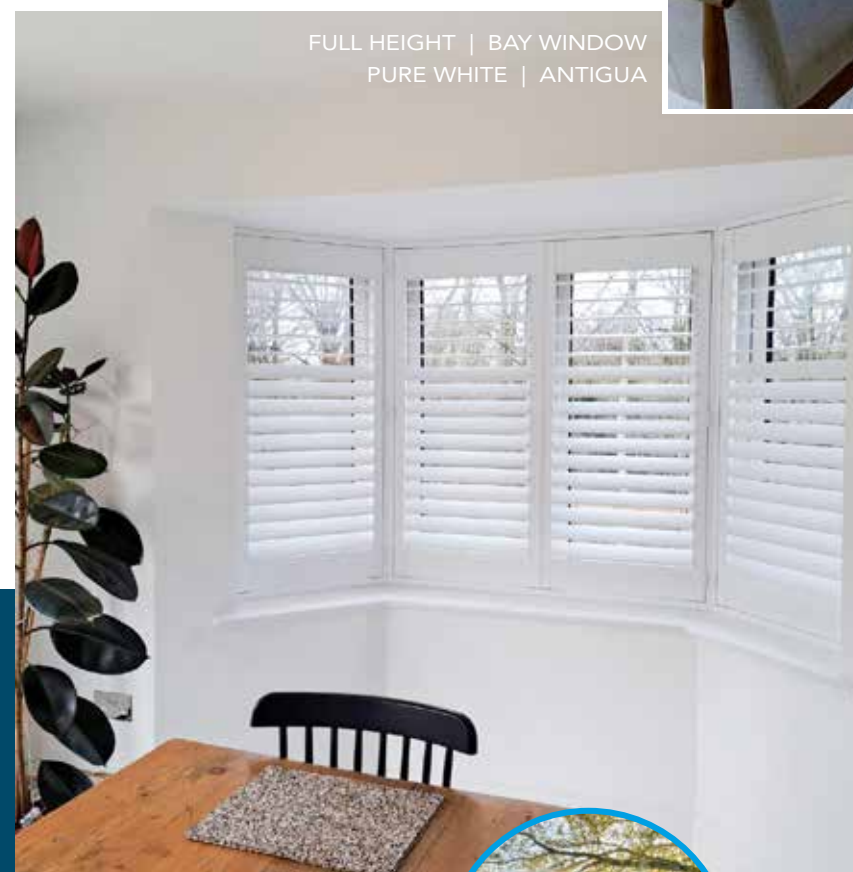

Solid Panel

Rich in character and charm, solid panel shutters are a favourite for period homes like cottages and Victorian townhouses. With no louvres, they offer complete privacy and superior insulation - ideal for those who love traditional style and warmth.

Bay Window

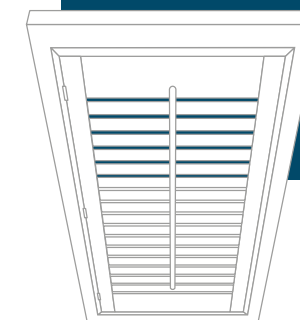

Designed to enhance the beauty of your bay windows, these shutters fit seamlessly, maximising space and adding timeless elegance. Not only do they transform your interiors, but they also boost your home's kerb appeal from the outside.

DID YOU KNOW

shutters can reduce heat loss by up to 28%?*

Energy Efficiency with Shutters

Reduce Heat Gain
Shutters and blinds prevent overheating by reducing solar gain through the glass.

Reduce Heat Loss
Adding shutters to windows adds another insulating barrier to windows to retain heat.

Control Light & Glare
Artificial lighting can be reduced by controlling amount of daylight with shutters.

Control HVAC
Shutters are a passive cooling solution that reduces or eliminates the need for energy-intensive HVAC units.
